Python:

0. Ensure your computer is connected to the internet.
1. Go to https://www.python.org/downloads/ and download Python 3.6.1, the latest version of Python as of May 28, 2017.
2. Open the file you downloaded to start the installer.
3. I suggest putting a checkmark next to Add "Python 3.6 to PATH." Then, click on "Customize installation."
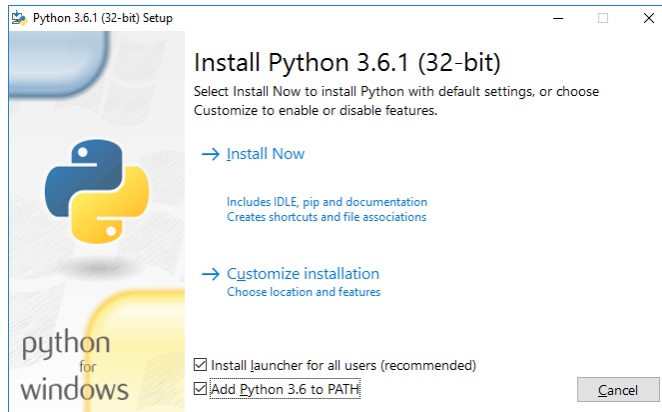

4. In optional features, ensure there is a checkmark next to "pip", "tcl/tk and IDLE", "Python test suite", and "py launcher." Then, click on "Next."
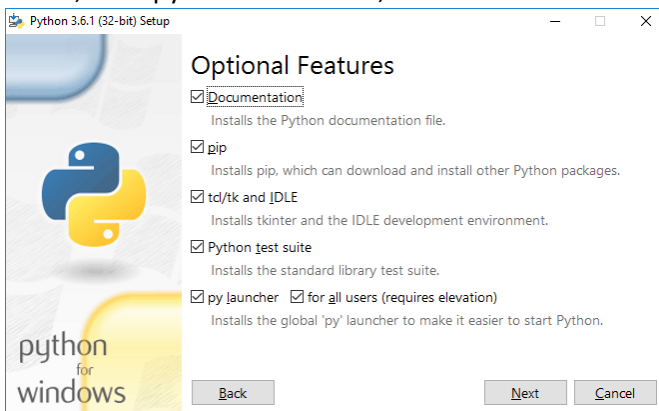

5. In advanced options, ensure there is a checkmark next to "Add Python to environmental variables" and "Precompile standard library." Then, click on "Install."
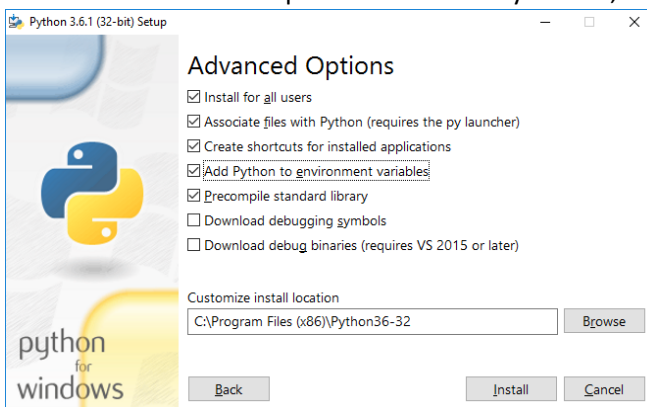

Pygame:

0. Ensure your computer is connected to the internet.
1. Open command prompt and type in the following command:[*]

```
python -m pip install pygame -user
```

2. Hit enter, and Python's pip package manager will automatically download and install the latest version of Pygame.

Fonts: Install all the fonts in the `fonts` folder.

Starting the game:

1. Navigate to the folder that contains the file called termProject.py
2. Click on "File", then "Open command prompt."
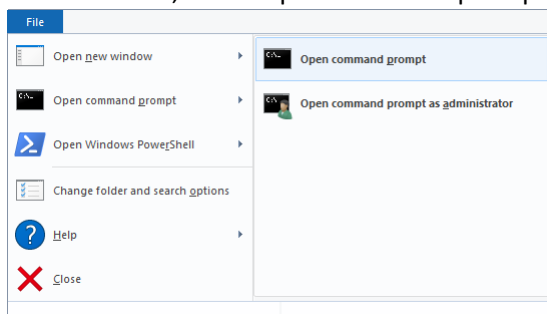

3. Type in the following command:[*]
```
python -i termProject.py
```
4. Hit enter to start the game.

---

[*] If the "python" is not recognized as a valid command, replace "python" with "python3" and try again.
